

Application No.: 10/668,736

Case No.: 58725US002

**AMENDMENT TO THE CLAIMS:**

The following list of claims will replace all prior versions of claims in the application:

1-18. (canceled)

19. (previously presented) An abrasive feature for an abrasive article comprising:

a base; and

a body projecting from the base, the body including a vertex, wherein the body is defined by four distinct sidewalls, and further wherein each of the four distinct sidewalls is defined by a parabolic section.

20. (original) The feature of claim 19, wherein the parabolic shape is approximately defined by a series of connected line segments.

21. (previously presented) The feature of claim 19, wherein each of the four distinct sidewalls is formed from the same parabolic section, and further each section is defined by the same locus in a mirror image, including an opposed image and left and right images.

22. (currently amended) A method of making an abrasive ~~article~~ feature, the method comprising:

filling a tool with a slurry, wherein the tool includes a plurality of negative images for forming features having a base and a body, wherein the body includes a vertex, wherein the body is defined by four distinct sidewalls, and further wherein each of the four distinct sidewalls is defined by a parabolic section;

curing the slurry to form the abrasive ~~article~~ feature.

23. (currently amended) The method of claim 22, further including:

applying a backing to the slurry after filling the tool with slurry ~~abrasive article~~.

Application No.: 10/668,736

Case No.: 58725US002

24. (currently amended) The method of claim 23, further including:  
removing the ~~article~~ feature from the tool after the slurry is at least partially cured.
25. (currently amended) The method of claim ~~[[23]]~~ 24, wherein said curing includes curing  
~~out of the~~ after removing the at least partially cured slurry from the tool.
